Wonning Enterprises acknowledges the Traditional Owners of the land on which we operate throughout Australia. We pay our respects to Elders past, present and emerging and recognise their continuing connection to land, waters and community.

Wonning Enterprises is proudly Supply Nation Certified, helping to support and create a diverse network of Indigenous suppliers around Australia.

Our Purpose

"Empowering Operations, Enriching Communities."

Supporting Local

We prioritise sourcing Australian-made products whenever possible. By buying local, we support Australian (and Indigenous) business, enhance national supply chain resilience and ensure high-quality supplies for our clients.

Delivering Quality

Our thorough supplier onboarding and rigorous quality assurance processes guarantee that only the best products reach our clients. We focus on dependable quality to keep operations running smoothly and meet the exacting standards of our customers.

Robust Logistics and Distribution

Our extensive logistics and distribution network across Australia allows us to source and deliver virtually any product. This minimises downtime, keeps operations on track and ensures our clients' needs are met without delay.

Industry Expertise

With over 15 years of experience managing supply chains for major Australian businesses within the mining sector, we bring deep industry knowledge and strategic expertise to optimise procurement and support operational efficiency.

We combine our deep understanding of industrial supply with strategic supply chain optimisation to be the reliable partner that drives our clients' success.

Our Services

Industrial Supply

We can source and deliver a wide range of industrial products, with the ability to increase our offering on request.

✔ Quality and Reliability

We source high-quality products, backed by thorough in-house supplier evaluations and rigorous quality assurance processes, prioritising Australian-made products to support local and indigenous businesses.

✔ Efficient, Nationwide Service

Wonning Enterprises has built strong relationships with logistics and distribution partners across Australia, ensuring reliable and timely deliveries for our clients.

✔ Delivering Value

We prioritise value for our clients without compromising on quality, ensuring our clients receive cost-effective solutions that meet both budget and operational needs.

Supply Chain Consulting

Wonning Enterprises offers strategic supply chain consulting to help clients optimise procurement and streamline operations.

✔ Leveraging Industry Experience

With over 15 years of experience, we bring deep industry knowledge to every project, ensuring that our clients receive actionable insights and strategies that strengthen their supply chain resilience and operational efficiency.

✔ Meticulous and thorough

Our supply chain consulting is built on a proven approach that assesses vendor performance, streamlines procurement and integrates solutions directly into client systems. This process optimises operations and reduces costs without disrupting our clients' ongoing business.

Reconciliation Action Plan Advisory

We guide businesses through their Reconciliation Action Plan (RAP) journey, whether they are developing their first RAP, assessing an existing plan or ensuring ongoing alignment with Indigenous commitments.

✔ Culturally Informed Expertise

As an Indigenous-led business, we bring firsthand knowledge and experience in managing relationships with Indigenous stakeholders, employees and Traditional Owners.

✔ Strategic RAP Implementation

From initial assessments to implementation and ongoing support, Wonning expertly helps organisations reach their RAP goals and stay on track to their commitments to the wider Indigenous community, employees and Traditional Owners.

Case Study

Addressing Existing Supply Challenges

The Challenge

A Tier 1 mining contractor engaged Wonning Enterprises to address ongoing supply chain challenges affecting their operational efficiency and availability.

They were struggling with low-performing consumable products and resource constraints whilst managing operational priorities.

Our Solution

Wonning Enterprises assessed our client's supply chain needs and uncovered that the incumbent supplier relied on overseas manufacturers, who were experiencing supply chain disruptions.

We identified and onboarded a local manufacturer capable of producing an equivalent product, which streamlined our client's procurement timeframes and reduced supply chain risks.

The Result

By sourcing locally, Wonning Enterprises enabled our client to achieve shorter lead times, improving their Delivery In Full, On Time (DIFOT) performance.

The switch resulted in higher-quality products that not only gained end-user acceptance but also contributed positively to health and safety standards on site.

In addition, our client's social spend commitments were bolstered, strengthening their commitment to local and Indigenous engagement.

Case Study

Supply Chain Consulting and Management

The Challenge

Our client faced difficulties managing materials and supply chain processes after acquiring new sites.

They lacked in-house expertise, were resource-constrained and had to focus on maintaining operational continuity.

The newly acquired sites required establishing effective materials management processes from scratch, creating a significant challenge for the organisation.

The Result

Significant improvements were achieved, including updated systems and streamlined processes that boosted operational efficiency.

The client now benefits from a clearer organisational structure, enhanced data alignment and upgraded technologies that have strengthened supply chain resilience and overall productivity.

Further technology releases delivered valuable improvements, helping the organisation build sustainable, long-term supply chain management capabilities.

Our Solution

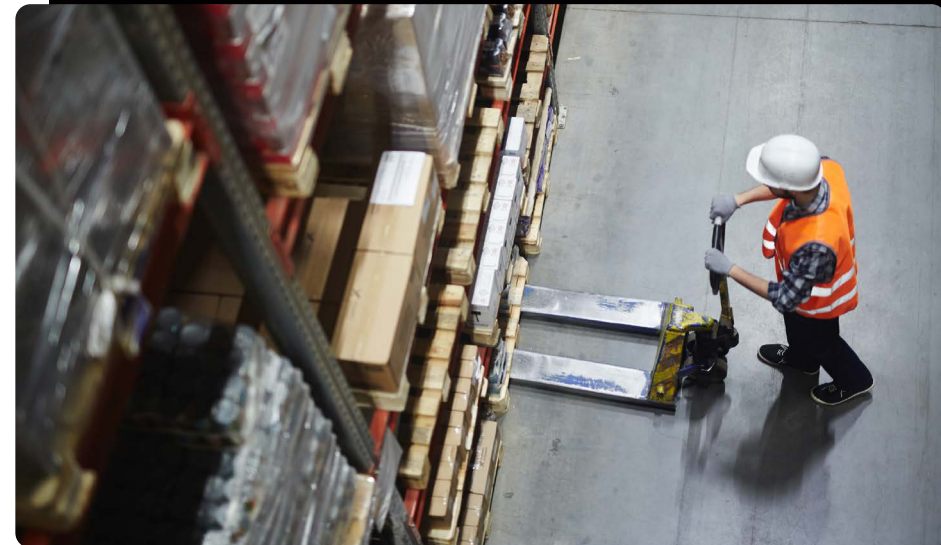

Wonning Enterprises worked with our partners to streamline materials management and supply chain processes.

We conducted a thorough performance review, identifying inefficiencies and bottlenecks.

Our team collaborated closely with stakeholders, mapping out key areas for improvement and creating a detailed action plan.

We provided external oversight, helped establish data alignment and worked to enhance the overall maturity of their processes.

Solutions ranged from simple master data updates to creating problem statements for technology solutions.
